ahc HARDWOOD
crystal spring

AHC Crystal Spring is a division of Atlanta Hardwood Corporation located in the heart of the Allegheny Mountains of Pennsylvania. Our fourth concentration drying yard specializes in red oak, white oak and poplar, along with hard and soft maple and cherry. We offer 4/4 through 8/4 thicknesses of FAS/1F, #1 Common and #2 Common grades in most species. We also inventory a selection of other hardwood species from throughout the northern Appalachian region. With more than 180,000 board-feet of kiln capacity, AHC Crystal Spring produces hardwood lumber for both the domestic and international markets. AHC Crystal Spring primarily exports through the port of Baltimore, MD, but also through New York, NY & Norfolk, VA. AHC also is capable to export from other east coast and west coast ports.

Species: Hard Maple, Soft Maple, Red Oak, White Oak, Black Cherry, Walnut, Birch, Hickory, Ash, Basswood, Poplar, Cypress

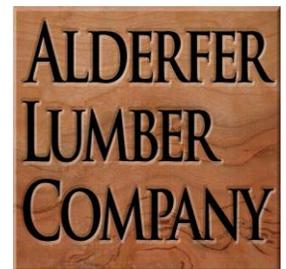

Products: Hardwood Lumber (4/4 – 8/4)

Alderfer Lumber Company

5532 Flint Valley Road
Mount Pleasant Mills, PA 17853

Tel: 570-539-2063
Fax: 570-539-8204

Contact: John Alderfer, President
Email: john@alderferlumber.com
Web: www.alderferlumber.com

Alderfer Lumber began in 1993 as a logging operation and expanded into a sawn mill with dry kilns after 1996. Today Alderfer produces over 600,000 board feet of dried lumber per year, controlling the quality from the standing tree to the finished board.

Alderfer Lumber prides itself on catering to the needs of each specific customer, providing them with the best lumber for their project. Being a smaller company affords them the ability to do this. Randall says "*We hate to tell a customer, no, we don't have it. It's very satisfying to tell someone that the material that they could not find anywhere is available here.*" Alderfer Lumber also provides custom and specialty services. No order is too small or too large. Their niche market is large slabs kiln dried for custom table tops, many with figure and/or character and natural markings from crotch cuttings.

Alderfer Lumber Co. is located in central Pennsylvania, a region home to some of the finest hardwoods available anywhere.

Species: Hard Maple, Soft Maple, Red Oak, White Oak, Black Cherry, Walnut, Birch, Hickory, Ash, Sassafras, Basswood, Poplar, Aromatic Red Cedar, Northeastern White Pine.

Products: Hardwood Lumber (4/4 – 12/4), Dimension, Figured Wood, Flitches

Allegheny Mountain Hardwood Flooring is a family owned business in the heart of Northern Appalachian hardwood country. Since 1938 the Hickman family has owned and operated a sawmill located in Emlenton, PA. This area of Pennsylvania is called the "Allegheny Plateau" and is known throughout the world for the quality of its oak and cherry hardwoods. Today Allegheny Mountain Hardwood Flooring uses this quality lumber to create finely crafted hardwood flooring. Allegheny Mountain Hardwood Flooring specializes in rift & quarter sawn red and white oak solid wood flooring, producing both strip and plank in clear and natural grades. We refer to our natural grade as Allegheny Rustic, a character grade of wood which incorporates the naturally occurring markings of each species including small knots, burls, and color contrasts. When you want the best for your home... the natural choice is Allegheny Mountain Hardwood Flooring.

Species: Black Cherry, Red Oak, White Oak, Ash, Hard Maple, Soft Maple, Beech, Black Walnut, Hickory, Poplar.

Allegheny Veneer is a quality source for the select logs used in the manufacture of wood veneers. We consider ourselves veneer log and timber merchants with an expert eye to identify those logs that are suitable for making the finest veneers. Allegheny Veneer's Corporate Headquarters is located in Corry, Pennsylvania. Satellite yards are located at Weston, West Virginia, Mt. Sterling, Kentucky and South Colton, New York. These yards are all centrally located near the finest hardwood forests to provide sourcing for particular species.

Species Offered from various states include:

Pennsylvania: Cherry, Hard Maple, Red Oak logs from the Allegheny National Forest

West Virginia: Cherry, Hard Maple, Red Oak logs from the Monongahela National Forest)

Ohio: White Oak and Walnut

Kentucky: White Oak and Walnut logs from Daniel Boone National Forest

New York: Cherry, Hard Maple, Birch from Adirondack Park and northern New York forests

The forests of Pennsylvania, New York, West Virginia and Kentucky have long been known for producing some of the finest hardwood timber in the world. At Allegheny

Veneer, our job is to find the very finest hardwood timber in the world and make it available to our customers as quickly and efficiently as possible.

Species: Cherry, Hard Maple, Red Oak, White Oak, Walnut, Birch, Elm, Ash, Basswood, Soft Maple, Yellow Poplar, Sycamore, Beech, and Hackberry

Products: Veneer Logs, Saw Logs, Table Top Logs/Flitches

Allegheny Wood Products, (AWP) was founded in Petersburg, West Virginia in 1973, and has grown to include TEN sawmills, including our modern mill in Marble, PA. (Annual Sawmill Production 24 million BDFT...56,633 cubic meters). The goal of the company is to provide superior hardwood products to the world market. The company owns a substantial amount of timberland and manages hundreds of thousands of acres for corporations and individuals. Over forty professional foresters work hard to insure the on-going quality of our timber and the sustainability of this resource. In addition to our six sawmills, the company operates five concentration yards which dry all the Appalachian species of hardwoods, the most common being Red Oak, Poplar, White Oak, Cherry, Ash and Hard and Soft Maple. (Annual Dry Kiln Production 100 million BDFT.... 235,970 cubic meters)

AWP is recognized as a leader in responsible forestry practices. In 1996, the National Hardwood Lumber Association awarded the Forest Stewardship Award to the company. All of AWP's operations are FSC Chain of Custody Certified. This certification acknowledges that forestry and procurement practices are indeed sustainable and legal.

Species: Black Cherry, Red Oak, White Oak, Ash, Hard Maple, Soft Maple,

Ruben Bocanegra, Export Sales
rbocanegra@baillie.com

Baillie Lumber is one of North America's largest hardwood manufactures, distributors and exporters of hardwood logs, lumber and lumber product. Founded in 1923 by James A. Baillie, we have grown from a regional supplier of domestic hardwoods to an international hardwood manufacturer that sources and ships hardwood from every region of the world.

Baillie's hardwood manufacturing facilities are spread north to south in the eastern United States. Our partner mills and suppliers in the U.S. and internationally supplement our own hardwood manufacturing capabilities and give us a breadth of specie availability unmatched by other hardwood manufacturers.

With a Sales staff strategically located throughout the U.S. and internationally. Baillie is well positioned as a leading hardwood manufacturer to be your single source for the world's hardwoods.

Bedford Forest Products (BFP) Inc. is a Pennsylvania log buying company owned and managed by Tom Mereen. With over 30 years experience, Tom has worked in many aspects of the industry from buying standing timber and logging in the woods, to the sale of sliced veneer. This vast range of experience includes time spent in sawmills and veneer mills. These experiences have given Tom the essential knowledge needed to sell quality hardwoods. Utilizing this knowledge, he is able to meet his customer's expectations and exacting requirements when he is selecting quality logs to fill each order. Whether you are looking for the highest quality veneer logs or material to produce rustic flooring, Bedford Forest Products can supply you!

BFP also offers customized log buying services. This buying service allows manufacturers to maintain a supply of quality raw materials. Over the years, Tom has developed a large network of suppliers throughout the best regions of the United States. Species sold include all major Appalachian and North American hardwoods. Rates depend on the species, quality and size of the logs. Also log measurement provided in scaling method of customer's choice.

BFP is now specializing in the production of burls and table top logs.

Species: Black Cherry, Red Oak, White Oak, Ash, Hard Maple, Soft Maple, Walnut, Ash, Poplar, Birch, Beech, Basswood.

Carl Rosenberry & Sons Lumber is a family-owned business, operating since 1920 and located in the heart of the Appalachian Mountains of Pennsylvania. Incorporating professional forestry management techniques, we harvest our timber within a 60-mile radius of our mill. Our tree-length harvesting system allows us to cut our logs to length inside the mill, permitting us to maximize yield and cut lengths requested. Our mill is comprised of two circle mills feeding a line-bar band re-saw, producing 40,000 board feet per day. The dry kiln capacity is 300,000 board feet with 1 million board feet of dry storage space. All lumber is graded after kiln drying. We offer surfacing (S2S) on our new 282 Newman planer. Our specialties are 5/4 and 4/4 Red Oak and White Oak, 4/4 Poplar and Ash. We will also do width sorts.

**Catawissa
Wood and
Components, Inc.**

Catawissa Wood and Components, formerly Catawissa Lumber & Specialty Co., Inc., is owned by Maski Hardwood Products of Quebec, Canada. They are a manufacturer of high quality Appalachian hardwood lumber and hardwood kitchen cabinet and furniture components. It buys rough-sawn lumber from multiple sawmills in the northeastern forests and sorts, kiln dries and machines dimensioned parts for cabinetry and furniture.

Catawissa has a heritage of over a half century in the manufacture of precision machined hardwood solids and glued/laminated products. Catawissa's reputation became internationally known for its quality and on-time delivery when it exported its products to Europe in the 1980's and to China in 2006.

With over 50 years of experience Catawissa Lumber is well positioned to continue to be a global provider of hardwood products to international markets.

Web: www.clc1.com

Since 1929, four generations of the Cummings family have been producing the highest quality hardwood lumber available in Northeast Pennsylvania. Cummings Lumber Co. Inc. is headquartered in Troy, Pa., and under the direction of Roy Cummings Jr. who currently serves as President of the company. The company’s foundation is the hardwood forest of Pennsylvania, which yields some of the best forestry products in the world. The most common species utilized by Cummings include cherry, red oak, white oak, hard maple, soft maple and ash.

Cummings Lumber purchases most of its timber from local landowners. It sells a portion of the purchased timber in the form of logs and then manufactures the balance into approximately 10 million board feet of hardwood lumber annually. Lumber is kiln dried at Cummings Lumber using steam generated from wood waste produced on site. Cummings Lumber also offers custom planing and ripping to customer specifications. Shipping is handled by truck, flatbed or container to all parts of the world. In addition to high quality lumber, Cummings also produces and sells wood pallets, wood crates, double ground bark mulch, wood chips and blocking lumber.

Species: Cherry, Red Oak, White Oak, Ash, Hard Maple, Soft Maple, Basswood

Products: Logs, Rough Lumber, Surfaced Lumber and Sized Components

Fulton Forest Products is family owned and operated by Larry and Steven Fulton. Our facility is located in northwest Pennsylvania, where some of the finest hardwoods in the world can be found. Specializing in kiln dried Cherry, Red Oak, and Soft Maple lumber we also produce a variety of other high quality hardwood lumber, veneer logs, and softwood shavings. With four generations of experience we understand the importance

of providing a quality product for our customers, while nurturing and managing our forests in a sustainable method.

The goal of Fulton Forest Products' timber management and harvesting group is to make certain we promote sustainable forests and Best Management Practices, while meeting the objectives of the landowner. In doing this we strive to: Utilize the entire product of the log – no waste; Comply and exceed all local, state, and federal laws that apply; Protect soil, air, and water quality; Protect and improve fish and wildlife habitat; Promote the future crop of trees by using silvicultural techniques; Oversee progress throughout the entire timber harvest; Minimize the harvesting impact by strategically planning the location of logging roads and skid trails; and Teach the importance of forests and wood products to others. At Fulton Forest Products we feel it is our responsibility to manage the timber so that future generations can also enjoy and profit from the choices that we make today in our forests.

Species: Cherry, Red Oak, Soft Maple, White Oak, Black Cherry, Walnut, Birch, Hickory, Ash, Sassafras, Basswood, Poplar, Aromatic Red Cedar, Northeastern White Pine.

Products: Kiln Dried Hardwood Lumber (4/4 – 12/4), Veneer Grade Logs, Animal Bedding/Shavings

Horizon Wood Products enjoys a successful history that extends over 32 years. The company deals exclusively with American Hardwood species and is recognized throughout and beyond the western European market as a prime source of high quality logs, boules and flitches. With onsite dry kilning and steaming capabilities, Horizon is equipped to meet the needs of the most particular customers. A true player in the global market: Horizon's products are shipped to more than 15 different countries in addition to

their domestic sales. Horizon has always had a strong environmental focus which they formalized in 2000 with the introduction of their own EverGreen Initiative. Their concern for the healthy future of American forests continues now with the FSC certification they achieved in 2008. Horizon takes great pride in the personal relationships they maintain with both suppliers and customers. The care they provide their customers is exceeded only by the care they put into the manufacturing of their high quality products. More information is available at www.horizonwood.com, or the website of their specialty wood division, Horizon Evolutions at www.horizonevolutions.com

Collins was founded in 1855 in Kane, Pennsylvania by T.D. Collins. Today, over 155 years later, Collins is one of the largest private landowner in the state of Pennsylvania and remains family-owned. Collins has expanded operations westward and now proudly owns additional certified forests in California and Oregon, where its headquarters are now located. Kane Hardwood, a division of Collins, manages the 116,000-acre FSC-certified Collins Pennsylvania Forest located in the heart of the Allegheny Mountains, which produces the finest black cherry hardwood in the world.

A champion of sustainable practices and protecting the integrity of the total forest ecosystem on their landholdings, which cover more than 307,000 acres, Collins upholds their long-standing commitment to land and resource stewardship.

Collins divisions are located in: Kane, PA; Richwood, WV; Chester, CA; Boardman, Lakeview, and Klamath Falls OR.

Species: Black Cherry, Soft Maple, Hard Maple, Red Oak, White Oak, Ash, Poplar, Basswood, Birch, Beech, White Fir, Ponderosa Pine, Lodgepole Pine, Sugar Pine, Incense Cedar, Douglas Fir, and Collins Pacific Albus a 100% plantation hardwood.

Products: Hardwood lumber and dimension; Softwood lumber; Collins Pine Particleboard and Collins Pine FreeForm Particleboard; TruWood Siding & Trim an engineered exterior wood product; and Collins Pacific Albus, FSC plantation hardwood.

Kerex is a supplier of green and kiln dried lumber located in south central Pennsylvania. The company specializes in shipping green lumber to the Middle East, India and other warm climates. Utilizing a special dipping process prevents mold and staining, green lumber is shipped around with the world with great success. Lightweight stickers minimize staining for shipping green lumber. Average containers of oak and maple will include approximately 12,000 board feet of lumber. Now your company has an alternative to get green lumber without the added expense of drying the lumber in the United States. Contact us for more information on this new process and to compare quotes. In recent years, we have shipped 250 containers per year to satisfied repeat customers in the United Arab Emirates, Saudi Arabia, Egypt, India and Vietnam.

Log & Lumber Trading was originally founded in 2002 in Germ now expanded with a site in central Pennsylvania, providing access to logs and lumber through the state and region. The owner, Ulli Herrmann, began his career as a professional carpenter and master craftsman in Germany, served as a manager in a lumber yard and gained years of experience in international trading. In 1999, he moved to the US and worked several years as the General Manager in a log company. Since this time he has direct contacts to loggers and is well established in the United States as a log business. His Pennsylvania business was established in 2008. Not only because of his knowledge regarding lumber and logs, but also because of his experience in working with wood during his education, Ulli Herrmann created a base of trust, confidence and dependability between him, his suppliers and his customers.

North East Hardwoods, Inc. is located in "heart of the finest quality Black Cherry region," just five miles south of Marienville, PA. We specialize in veneer log sales, both domestically and internationally with Black Cherry veneer being our primary specie.

We have over 180 years of forest industry experience and take pride in providing superior quality hardwood logs to customers worldwide. We buy timber from the Allegheny Plateau region of northwestern Pennsylvania which is home to high quality Black Cherry, Red Oak, White Oak, Hard (Sugar) Maple, and Soft (Red) Maple.

Originally established in 1988, North East Hardwoods, Inc., now only deals in handling of logs. Because we do not further manufacture our logs, it is our goal to find the right

buyer for every log that comes into our yard. Our three foresters cruise approximately 12 million board feet of standing timber every year, searching for only the highest quality hardwoods in Northwestern Pennsylvania. We buy timber from the Allegheny National Forest, the Commonwealth of Pennsylvania state forest, the Game Commission, private consultants and individual landowners. Our loggers are trained and experienced to assure that the highest grade logs are properly cut out of each tree. When the logs are delivered to our yard, each one is graded, scaled, tagged, inventoried, and sorted according to grade species. We only scale using the Doyle log scale method. More information is available on our website at: www.veneerlogsales.com

Northern Appalachian

Log & Forestry

Coudersport, Pennsylvania
Serving Customers Worldwide Since 1987

Paul Buchsen founded Northern Appalachian Log & Forestry C 1987 to meet the demand for high quality veneer and export logs from a growing number of international and domestic markets.

We are located in the heart of “Penn’s Woods”. This allows us close proximity to a steady supply of high quality Northern Pennsylvania hardwoods. This area is renowned for forests which produce some of the world’s finest hardwood. We specialize in black cherry, hard maple, soft maple, red oak, ash, and basswood. Our logs are sourced from public and private landowners: sawmills, and company owned timberland throughout the region. Our knowledge of the resource allows us to offer and prepare only logs that meet our customer’s demands.

The staff at Northern Appalachian Log & Forestry has many years of experience in all facets of the forest products industry. We have a dedicated team that is determined to fulfill the expectations of veneer and export log customers. We take care to ensure each log is harvested and delivered to our yard properly and efficiently. Our professional staff of employees takes pride and care in grading logs to customer specifications. We containerize both veneer and sawlogs for export. All logs are waxed and flitch saved upon our customer’s request. We offer a year round supply of veneer and export logs

At Northern Appalachian Log & Forestry we accept the responsibility and challenge to meet our customers’ ever-changing needs in the market place. We have a serious commitment to this philosophy. Our years of experience, high quality hardwood, and attention to detail enable Northern Appalachian Log & Forestry to provide outstanding customer service.

Web: www.Penn-Sylvan.com

Founded in 1995, Penn-Sylvan International is a manufacturer and supplier of hardwood lumber and veneer logs located in the northwestern corner of Pennsylvania, USA. Our area, otherwise known as the Northern Appalachian region, is well known for the excellent color and tight grain pattern of logs harvested from its timberlands.

Our international customers have come to rely upon the quality hardwoods that we have provided for many years. Our primary goal has always been for long-term business relationships to supply required hardwoods on a consistent basis. Company president, Bill Reese, has over 50 years' experience in the hardwood industry and knows what it takes to satisfy today's demanding export market.

We offer a reliable source of cherry, hard maple, red oak, and white oak veneer logs, quality 4 sides clean (4SC) suitable for manufacture of fancy plywood and panels. We also supply other grades, including quality 2 sides (2SC) and 3 sides clean (3SC) logs that are used in production of flooring materials, plywood, window blinds, and furniture parts.

Hardwood lumber is cut or sourced from this region of Pennsylvania only, then kiln dried on-site in company dry kilns and graded per NHLA rules; ensuring our customers that they will receive the best quality in lumber that our region has to offer. Lumber sizes range from 3/4 to 8/4 and red oak, white hard maple, white soft maple, and black cherry are species we kiln dry on a monthly basis for delivery to the domestic and export markets. Our specialty item, 3/4 red oak and 3/4 white oak is something others are not producing in volume that we are offering. Total annual production of all kiln dried lumber is approximately 12 million board feet.

We are a family owned operation which manufactures and exports Pennsylvania and Appalachian hardwoods to over 21 different countries worldwide. The main operation is handled by a management team of three people. Together, we have over 50 years of experience in the hardwood export business. All of the company's production, some 5 million board feet, is exported. The facility is located in the heart of Pennsylvania's prime forest region. Our company specializes in the manufacturing of **4/4-10/4 White Oak lumber as well as 4/4 White Oak and 4/4 Red Oak strips**. We produce ripped to width strips in various qualities for the flooring, moldings, cabinet and furniture industries. We can also supply 4/4 - 10/4 in White Oak, Red Oak, Cherry, Poplar, Hard Maple, Soft Maple, Walnut and White Ash. Other items we export are veneer and saw logs, Cherry Veneer, Flitches, Backing boards and Staves for the wine barrel industry. All of our lumber and strips are inspected twice to ensure proper grading for our customers. We can also grade according to the customer's requirements. Special requests are welcome

At Salem Hardwood, we strive for 100% satisfaction with each landowner and customer we serve. We provide fair, honest, and professional advice to every timberland owner seeking our counsel. Our obligation to each landowner transcends day to day economic concerns as we focus on providing continued regeneration of high quality resources, protecting the natural environment and improving the woodlands for multiple recreational uses. Our customers receive prompt and efficient service, and exceptional forest products. We demand the highest prices for our products, but we stand behind their quality, grade and appearance. Repeat business with both landowners and customers has been one of our greatest strengths. We enter into each transaction with the expectation of a continued business relationship and future dealings. Our long term success can be achieved only by maintaining a strong, positive reputation in the hardwood log and lumber markets. A good reputation is our business.

**TUSCARORA
HARDWOODS**

For hundreds of years “Penn’s Woods” (Pennsylvania) has been meeting the needs of its residents for the finest timber and wood products. From furnishing shelter, fuel, weapons and hunting grounds in pre-colonial days, through supplying charcoal for the steel industry, to today providing world-leading quality hardwood products for the furniture, millwork, cabinetry and flooring industries, Pennsylvania has always relied on its forest landscape.

Tuscarora Hardwoods, located in the heart of this Northern Appalachian forest, brings to market over 10 million board feet per year of the finest 4/4 – 12/4 Yellow Poplar, 4/4 – 8/4 Red Oak, 4/4 & 5/4 White Oak, 4/4 & 8/4 Ash and Walnut, and 4/4 Hickory, Hard and Soft Maple. Whether it is FAS/F1F for mouldings and door production, or Common grades for furniture and flooring, Tuscarora’s lumber is manufactured and graded to maximize the value from the forest resource, giving our customers the highest return on their hardwood budget.

Offering a full suite of services including green on lath shipments, straight line ripping (SLR2E), Surfacing (S2S), fingerjoint, and export preparation after KD, ensures we provide our customers with the right material to suit their production requirements. With 500,000 board feet of kiln capacity, our main products are always “in the pipeline,” ensuring steady availability and reliable delivery times. Our doors are open and we look forward to meeting your needs for the finest hardwoods in the world, straight from the heart of “Penn’s Woods.”

WOODRICH

Woodrich has a simple mission: salvage wood and provide those trees with a second life. Woodrich specializes in cutting large slabs or flitches of wood that will have significant character and grain interest. These slabs can be manufactured into unique

table tops, benches or other unusual pieces of furniture. We can provide slabs from 12-48 inches in width, and from 4/4-16/4 in thickness. Length will vary up to 20 feet.

Woodrich salvages what others discard due to disease or avoid because they're just too big. We mill these beautiful trees into usable products for our clients. We have the ability to cut trees that other mills cannot imagine cutting, because we have the specialized equipment to do so. The inventory of available species varies greatly from day to day. The unusual character and quality of our fitches has earned us the motto, "Finishing What Mother Nature Started".

We are located in north central Pennsylvania, in Williamsport, the historic hardwood capital of the world, with easy access to all major species of the northern temperate hardwood forest. Slabs are air-dried or can be vacuum kiln dried. We look forward to working directly with our clients to meet their individual needs for each fitch.

Species: Hard Maple, Soft Maple, Red Oak, White Oak, Black Cherry, Walnut, Birch, Hickory, Ash, Sassafras, Sycamore, Poplar, White Pine.

Products: Hardwood Fitches/Slabs (4/4 – 16/4)

The Pennsylvania Hardwoods Development Council was established by the legislature of the state to nurture the development, expansion, and promotion of the hardwoods industry in Pennsylvania. The Council includes representatives from every aspect of the wood products sector in the state: sawmill operators, veneer manufacturers, value-added processors, furniture producers, pulp and paper producers, trade associations, regional hardwood groups, and maple syrup producers. Combined, this group aims to support and assist the forest products industry to develop both domestic and international markets for Pennsylvania's diverse wood products.

Pennsylvania leads the United States in the production of hardwood lumber providing over 10% of the nation's supply, has the largest hardwood forest in the United States, and is a national leader in the supply of FSC-certified hardwood lumber, as well as its strong Sustainable Forestry Initiative program. Pennsylvania also leads the United States in export of hardwood lumber.

Please contact the Pennsylvania Hardwoods Development Council for assistance locating suppliers for any hardwood product.
